

## Adding Value

## Collaborating to Add Value and Improve Service

We see the benefits to be gained from working, sharing and learning from others. To this end, we play an active role in collaborating with 7 other major internal audit partnerships around the UK, through the Audit Together network.

Together we share with 11 County Councils, 10 Unitary Councils, 5 London Boroughs, 27 District/Borough Councils, 4 Police Authorities, 3 Fire Authorities and numerous other public-sector bodies, maintaining an extensive pool of knowledge and experience in internal audit and representing the profession at both a national and international level.

As a collaboration we meet quarterly and provide our Partner organisations with quarterly bulletins 'An Internal Audit View' to share the most topical and pertinent internal audit issues across the collaboration for circulation to all relevant stakeholders. This year we provided a view on topics such as Devolution, Integrated Assurance for Health and Social Care, Safeguarding, Effective Audit Committees and Panels, Organisational Culture, Transformational Change and wide range of other topics.

If SWAP or our Collaboration Group can be of any assistance to you and your team, please feel free to get in touch – we're happy to work together. Please click on the link below to view our Quarterly Bulletins 'An Internal Audit View'
